

GRAPH 1 – HISTOGRAM (EXAM SCORE DISTRIBUTION)

All 6607 students' exam scores were nearly normal with the majority of students scoring between 62 and 70. The distribution was clustered around the mean of 67.24, indicating that most students scored at the medium level and there were relatively few at the extreme ends of the range.

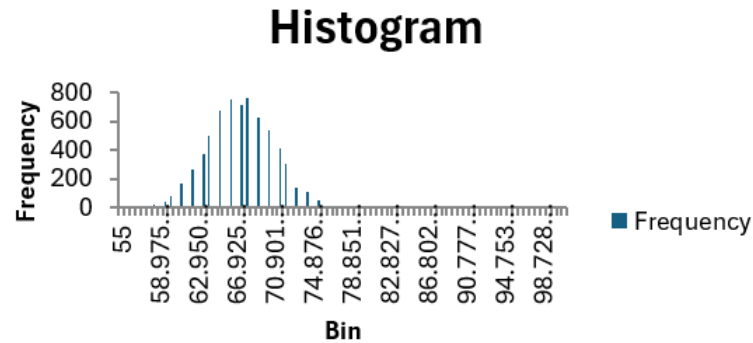

Figure 1 : The histogram shows exam scores concentrated between 62 and 70, with the highest frequency at bin 66.925, confirming a near-normal distribution centred around the mean of 67.24.
