

GRAPH 3 – AVERAGE EXAM SCORE BY ATTENDANCE RATE

The higher the attendance rate, the better the exam scores, for students in all bands. The average scores increased consistently from 64.2 for students who attended 60-69% of the time to 70.1 for students who attended 90-100% of the time, and this trend was clearly visualised.

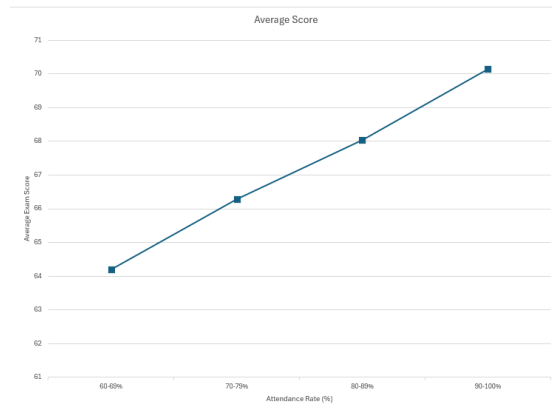

Figure 1 : The line chart reveals a clear positive trend, where students with higher attendance rates (90–100%) achieve greater average exam scores (~70), compared to those with lower attendance (60–69%) scoring around 64.
