

RUNNING THE J48 CLASSIFIER

After exploring the data I moved to the Classify tab to run the J48 Decision Tree classifier. I selected J48 from the trees folder by clicking on it. I went to the settings and changed confidenceFactor to 0.25 and minNumObj to 2. I chose Cross- validation with 10 folds for the test method and chose the class attribute as (Nom) Exam_Score. I then pressed Start and waited for WEKA to finish the 10-fold cross- validation.

Classifier output		
Time taken to build model: 0.07 seconds		
=== Stratified cross-validation ===		
=== Summary ===		
Correctly Classified Instances	4752	71.9237 %
Incorrectly Classified Instances	1855	28.0763 %
Kappa statistic	0.5788	
Mean absolute error	0.2113	
Root mean squared error	0.4033	
Relative absolute error	47.5649 %	
Root relative squared error	85.554 %	
Total Number of Instances	6607	

Figure 3 :J48 Decision Tree configuration and results in WEKA Classify Tab. confidenceFactor=0.25, minNumObj=2, 10-fold cross-validation. Overall accuracy = 71.92%, Kappa statistic = 0.5788.
